

Bearings For Severe Service Environments

Which would you rather use on your filler equipment?

EDT Radial Poly-Round® products are non-contaminating, 316 stainless, with no balls, and use no grease!

- Grease-less
- Non-corrosive (never rusts)
- No ball bearings (reduces possibility of foreign material contamination)
- Clean operation (USDA-accepted)
- Longer life means less downtime
- Reduced total cost of ownership
- Variety of materials for different applications
- Available in numerous styles and sizes
- Let us know your needs and how they are used!

Radial Poly-Round® products are proving their value on equipment by manufacturers such as Zilli & Bellini

Elmar
Norwalt
Allpax
Bosch
Yamato

Keep it clean!

EDT grease-less bearings are the only USDA accepted bearings on the market!
Ideal for HACCP / HARPC programs!

LET EDT HELP YOU DESIGN YOUR BEARING

Fill out a Bearing Design Checklist

For operations where ball bearings don't last as long as you'd like, complete a

BEARING DESIGN CHECKLIST

and let EDT help you select the right bearing for the specific application
