

# QUIKLEAN® BEARINGS

**Stand up to  
food safety  
issues on the  
process floor!**

**A cleaner alternative to standard mounted bearings**

- QuiKlean® bearings dimensionally interchange standard 2-bolt, 3-bolt, 4-bolt, pillow block and tapped base housings, with 5/8" stand-off for cleaning.
- Components can be purchased individually
  - Reduce replacement costs
  - Lower inventory
  - Maximize flexibility

BY TIMKEN

# Why do QuiKlean® bearings stand above other food industry bearings?

5/8" stand-off allows wash-down from all sides

## Choice of bearings:

- Ball bearings (Value, Choice, Classic)
- Poly-Round® (Select material based on the application)

Available in polymer or machined stainless steel

1 piece housing construction with smooth surfaces

No crevices for highest level of sanitation

Integrated stand-off ideal for HACCP programs

Available in shaft sizes from 1/2" to 1-1/2"

5/8" stand-off for maximum cleanability and limited contact area, reducing places where bacteria can hide

Styles, materials, sizes for all installations

For assistance selecting the best bearing for your application, complete a **Bearing Design Checklist (BDC)**
